Under 327 IAC 3-2.1-3, sanitary sewer extensions do not require a permit from IDEM if the plans are prepared by a professional engineer, submitted to and reviewed by a local publicly-owned sewer authority, and meet all state water pollution control rules and if the local authority then notifies IDEM. Similarly, under 327 IAC 3-2-4 (11-13), repairs, replacements, modifications, or additions of equipment for an existing municipal or industrial water pollution treatment/control facility do not require a permit if they are not made to treat a new influents, or if there is no increase in the capacity of the facility. These rules became effective June 17, 1999, and their subsequent impact is reflected in the decreasing numbers of applications pending.

\* HEA 1919, effective July 1, 1999, reduced the allowable time frame for IDEM review of wastewater construction permit applications from 120 days to 90 days.

\*\*The data provided for applications pending represents a "snapshot" of the number of permit applications pending at the end of the given month.
